

Lab 12

CSS Transforms, Transitions, and Animations

DESCRIPTION

Build a series of CSS transforms, transitions, and a keyframe animation.

INSTRUCTIONS

- ☐ **STEP 1:** Open lab-12.html and examine the HTML and CSS provided.
- ☐ **STEP 2:** Transforms - build out a CSS **rotate**, **scale**, **skew**, and **translate** on each of the <p> elements, using the embedded CSS.
- ☐ **STEP 3:** Transitions - Create a rule for each of the above <p> elements, where the transform changes on **:hover**.
- ☐ **STEP 4:** Create a 5th <p> element with a unique color of your choosing.
- ☐ **STEP 5:** Create a simple looping animation with at least 4 keyframes for the 5th <p> element you created in step 4 – make it interesting.

EVALUATION

Criteria	Mark
Marks are assigned based on the steps completed above.	/5
